Please find below and/or attached an Office communication concerning this application or proceeding.

## Office Action Summary

**Application No.**

09/314,119

**Applicant(s)**

EL KOLLI, YACINE SMAIL

**Examiner**

Thien D Tran

**Art Unit**

2665

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 30 April 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 56-73 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 56-73 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).  
a) ☐ All b) ☐ Some \* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 56-60, 65-69 are rejected under 35 U.S.C. 102(b) as being participated by Hodgkinson (WO 97/36453).

Regarding claims 56, 65 Hodgkinson discloses a sending method of sending a data packet from a source node to a destination node through a switching network, the data packet including user data and additional data, said method comprising the steps of:

defining a path to be followed on the network by the data packet, page 5 lines 20-23;

selecting a virtual channel representing a connection between the source node and the destination node, page 10 lines 5-15; and

sending the data packet with VPI/VCI, PT, OF, SA, DA (additional data), the selected virtual channel and an identifier of the source node, capable of representing the defined path, page 10 lines 10-25,

wherein the combination of the virtual channel and the source node identifier makes the connection unique in the switching network, page 10 lines 5-15, and

wherein the additional data allows the destination node to determine the transmission mode of the data packet, connection (connected) or connectionless (non-connected), on the basis of data representing at least one of the virtual channel and the source node, figure 7.

Regarding claims 57, 66, Hodgkinson discloses that the data packet includes route information representing each node on the VPI/VCI with port ID (defined path) in the network through which the user data must pass in order to reach the destination node, page 3 lines 10-15.

Regarding claims 58, 67, Hodgkinson discloses a reception method of receiving a data packet transmitted from a source node to a destination node through a switching network, the switching network being adapted to carry data in a connected mode and a non-connected mode, the data packet including user data and additional data, the additional data representing at least a virtual channel and an identifier of the source node, said reception, figure 7, method comprising the steps of:

reading the additional data, page 11 lines 5-10; and

determining the transmission mode of the data packet, connection (connected *or* non-connected), on the basis of data representing PT field then at least one of the virtual channel and the source node, page 11 lines 9-11.

Regarding claims 59, 68, Hodgkinson discloses that the destination node has a memory in which additional reference data are stored and said determining step includes comparing additional reference data and the additional data read in said reading step, page 11 lines 17-15.

Regarding claims 60, 69, Hodgkinson discloses that during said determining step, the transmission mode is determined as connected when the additional reference data and the read additional data are identical, page 11 lines 17-15.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 61-64, 70-73 rejected under 35 U.S.C. 103(a) as being unpatentable over Hodgkinson (WO 97/36453) in the view of Kessler et al (U.S Patent No. 5,864,738).

Regarding claims 61, 62, 70, 71, Hodgkinson discloses that during said determining step, it is determined that the transmission mode is non-connected, said reception method further comprises the step of reading, in a packet.

Hodgkinson does not disclose reading the size of a message to be received from the source node, and reserving sufficient memory to store the entire message according to the read size of the message. However, Kessler discloses determining packet length for the reservation of memory in the buffer to store the packet, col.16 lines 15-20, 65-67. Therefore, it would have been obvious to one having ordinary skill in the art to have the feature of reading the packet size and reserving memory for the received packet so that the packet can be stored properly for processing by the switch.

Regarding claims 63, 72, Hodgkinson discloses clear out the setup signaling (erasing the additional data) after said reserving step has been performed, page 1 lines 18-21.

Regarding claims 64, 73, Hodgkinson does not sending an acknowledgment packet to the source node as an acknowledging reception. Kessler discloses send an ack signal back to the sender when the receiver receives data, col.12 lines 50-55. Therefore, it would have been obvious to one having ordinary skill in the art to have the feature of acknowledgment message sending back to the source node so that the source node knows the status of its transmission.

### ***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2665

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

***Conclusion***

6. Any inquiry concerning this communication or earlier communication from the examiner should be directed to Thien Tran whose telephone number is (703) 308-4388. The examiner can normally be reached on Monday-Friday from 8:30AM to 5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Huy Vu, can be reached on (703) 308-6602. Any inquiry of a general nature of relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 305-3900.
